

**The best of both worlds
for the worst of all seasons**

SETRON[®] FLEET 0W-30 and SETRON FLEET 10W-40. Cleaner, longer performance under all conditions.

The cleaner your natural gas engines, the longer they run. That's why so many operators of small to mid-sized stationary and mobile engines rely on Petro-Canada's SETRON FLEET 0W-30 and SETRON FLEET 10W-40 natural gas engine oils. Formulated with a high performance additive package, they prevent excessive combustion chamber ash deposits and provide superior wear protection in your engines. SETRON FLEET can save you money by providing reliable, trouble-free operation of engines used in oilfield, irrigation and mobile applications.

Superior protection.

SETRON FLEET 0W-30

- ◆ A low ash, synthetic blend formulation that provides all-season reliability and inventory consolidation opportunities
- ◆ Provides extreme low temperature performance down to -48°C through ease of start-up and reduced wear
- ◆ Excellent cleanliness by reducing valve stem sticking, providing less downtime

SETRON FLEET 10W-40

- ◆ A low ash NCEO to minimize spark plug ash fouling
- ◆ Wide operating temperature range for the most demanding conditions
- ◆ Outstanding anti-wear protection
- ◆ Conforms to Cummins CES 20074 specification

Prove it for yourself.

Switching natural gas engine oils isn't a decision you take lightly. We understand that, and that's why we're prepared to help you conduct your own field tests. We're confident that you'll discover just how much better SETRON FLEET performs compared to conventional products and high ash engine oils.

It all starts with 99.9% pure base fluids.

SETRON FLEET starts pure to protect better, longer. The patented HT purity process we use eliminates impurities that hinder performance. Then we add a unique combination of additives to provide superior performance, and advanced protection against rust and corrosion.

Like all Petro-Canada products, SETRON FLEET goes beyond today's standards to meet the demands of tomorrow's technology. After all, we've been producing advanced lubricants blended from ultra-pure base oils and specialty additives for over 25 years.

To discuss details of a field test at your facility, just call your local Petro-Canada distributor. Or contact us directly.
