**NATURAL GAS ENGINE OIL**

Beyond today's standards.

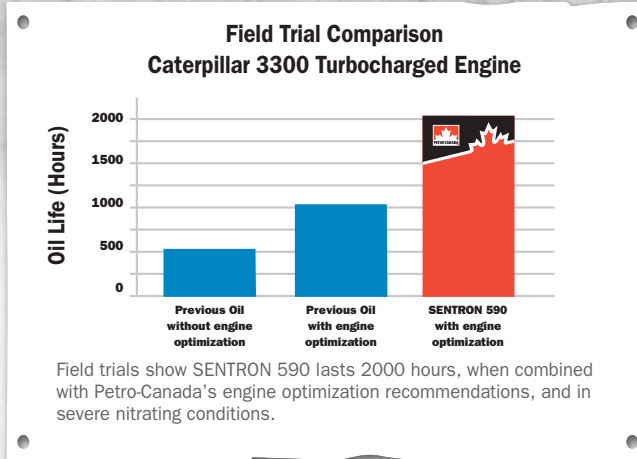

# NEW SENTRON 590. FIELD TESTED. FIELD PROVEN TO LAST LONGER.

Severe nitrating conditions are known to drastically reduce the life of your natural gas engine oil. New SENTRON 590 has been specifically formulated to enhance nitration control. Combined with Petro-Canada's engine optimization recommendations, and in severe nitrating conditions, SENTRON 590 can deliver up to 200%\* longer oil life.

SENTRON 590 can give you extended drain intervals while providing long-lasting equipment protection. Its exceptional control of carbon deposits helps to protect against equipment wear. For your operation SENTRON 590 can bring major advantages to improve your bottom-line performance through:

- ✓ Increased uptime and higher productivity
- ✓ Fewer change-outs for less environmental impact
- ✓ Reduced lubrication costs
- ✓ Reduced labour costs
- ✓ Reduced disposal costs

## FIELD TESTS DEMONSTRATE THE DIFFERENCE

Extensive field testing in Caterpillar 3300 and 3500 engines demonstrates the long-lasting performance of SENTRON 590.

## PERFORMANCE. PURE AND SIMPLE.

Like all Petro-Canada products, SENTRON 590

goes beyond today's standards. We begin with the patented HT purity process to produce 99.9% pure, crystal-clear base oils – among the purest in the world. This removes impurities to reduce carbon build-up that can hinder performance. Then we add a unique combination of additives to produce a high performing natural gas engine oil that delivers extended oil life through enhanced nitration control.

**GET UP TO 200%\* LONGER OIL LIFE WITH SENTRON 590**
